***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-3**, drawn to a method for manufacturing a copper electroplating material, classified in class 423, subclass 604.
- II. Claims **4-9**, drawn to a copper electroplating material and a copper plating method, classified in class 205, subclass 291.
- III. Claims **10-13**, drawn to a method a method for manufacturing a copper plating material, classified in class 423, subclass 604.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects.

Group I is directed to a method for manufacturing a copper electroplating material that produces copper oxide.

Group II is directed to a copper electroplating material and a copper plating method that does not require the method steps of Groups I and/or III.

Group III is directed to a method for manufacturing a copper plating material that produces copper carbonate.

The methods recited above contain steps that are methodically different from

each other and are not required for each of the Groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I and III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
